SEBO AUTOMATIC X4, X7, X7 Premium and X8

The AUTOMATIC X series is the world's most technically advanced and most simple to use vacuum cleaner available!

Available in two powerhead widths, the 12-inch X4 and X7, and 15-inch X8 feature an automatic height adjuster - an electronic controller that measures the resistance of the spinning brush roller against the floor surface to signal up or down adjustments - which ensures optimal performance on both carpets and hard floors. The user is also alerted to clogs, a worn brush, or a full bag, and the vacuum automatically shuts off when brush obstructions occur to protect the motor and belts from damage. The X also has a lifetime belt warranty.

The X7 Premium models offer a choice between two modes of automatic brush agitation. The default setting is perfect for most flooring types but by pressing the Brush-mode Button, greater resistance of the spinning brush roller against the floor is allowed, which causes more aggressive and deeper brush action (not available with Red X7 or X8).

The X7 Premium PET is additionally equipped with a hand-held turbo brush, a nine-foot extension hose, and a charcoal anti-odor microfilter that absorbs pet odors (pictured below).

The X7 Premium and X8 models have an LED headlight to help illuminate the cleaning path

A low, 6-inch, flat-to-the-floor profile makes cleaning under furniture easy!

Additional Features:

Automatic Height Adjustment from Hard Floors to Carpets

The electronic controller adjusts the powerhead up or down to the appropriate brush height, providing optimal cleaning of both carpets and hard floors. The "sealing strip," located behind the brush roller, improves hard floor cleaning performance by channeling the airflow and preventing debris kickback.

Stationary Use Light

When the vacuum is stationary in its upright, handle-locked position, the powerhead adjusts upward to the height necessary (or to its highest possible level) to disengage the spinning brush roller from the floor. However, if the brush remains in contact with carpet fibers, despite the powerhead's upward adjustment, the red "check brush" warning light flashes to alert the user to avoid potential carpet marking from excessive use time in a stationary position.

Brush Adjustment Indicator Lights

Two green lights, one for "up" and one for "down," illuminate to indicate when the powerhead is adjusting the brush height to the proper cleaning level. Optimal cleaning effectiveness occurs when both lights are off.

Full Bag or Clog Light with Automatic Shut Off

When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, the red "bag full or clog" warning light illuminates, the vacuum automatically shuts off after 30 seconds, and then the warning light starts continuously flashing. This feature prevents overheating and motor damage from a lack of adequate airflow.

Brush Obstruction Light with Automatic Shut Off

If an obstruction jams the brush roller, the red "check brush" warning light flashes quickly, the brush roller immediately stops spinning, and the vacuum shuts off. This feature prevents the belts from breaking and protects the motor and carpet from damage.

Instant-use Wand and Suction Hose

The integrated instant-use wand and suction hose are able to clean hard to reach corners, edges and crevices. The wand and hose together have an 8-foot reach with an optional 9-foot extension hose available, which creates a total hose length of 15-feet, perfect for cleaning stairs. Choose from a range of optional attachments that can be fitted to the wand or hose!

Carrying Handle with Rotating Cord Hook for 40' cord

The AUTOMATIC X is easy to carry or quickly unwind the cord, using its unique handle with integrated rotating cord hook.

Worn Brush Light and Easy Brush Roller Removal

When the brush roller's bristles are worn to a point that brush agitation is less effective, the red "check brush" warning light remains illuminated during use while the vacuum continues to operate.

Foot Pedal Stress Release

The quick-release foot pedal maximizes durability, by relieving excessive stress or force on the handle and bag housing, when it is in the upright, locked position.

Three On-board, Full-size Tools and Large Filter Bag

The vacuum comes standard with a crevice nozzle, dusting brush, upholstery nozzle, and a large 5.3 litre filter bag. Also, many optional accessories are available.

Soft-start Feature

The vacuum's gradual power-up capability extends motor life.

Attachments			
Included X7, X7 Premium, X7 Premium Pet and X8	 Upholstery Nozzle #1491GS	 Hand-held Turbo Brush #6179ER	 S-class, Charcoal, Anti-odor, Pre-motor Microfilter #5425
	 Crevice Nozzle #1092GS	 Nine-Foot Extension Hose #1495ER	
 Dusting Brush with Horse- hair Bristles #1387GS		 Crevice Tool #1092GS and Upholstery Nozzle #1491GS	
Optional Three-piece Kit	 22-inch Extension Wand* #1084GS	 Nine-foot Extension Hose* #1495ER	 Parquet Brush* #1359GS
	<p>*All three items are available individually or as a three-piece attachment kit, #1991AM</p>		
Additional Options	 Dusting Brush, Large Opening, Nylon Bristles #1094GS	 Crevice Tool #SEB901F	 Dusting Brush, Nylon Bristles #1329GS
	 Wall and Floor Brush #1325GS	 Radiator Brush #1496GS	 Flat Upholstery Nozzle #1090HG
Bags, Filters, Accessories and Wear Items			
 8 Ultra Bags** #5093N	 S-class, Pre-motor Microfilter** #5036ER	 S-class, Char- coal, Anti-odor, Pre-motor Microfilter #5425	 Electrostatic Exhaust Filter** #52038ER
 Service Box #51828ER	 SEBO FRESH 1 Pkg. of 5 #0496	 HEPA Service Box #51829ER	 HEPA Service Box con- tains 8 Ultra Bags, an Electrostatic Exhaust Filter, and a HEPA Pre- motor Microfilter
 12" Brush Roller (Soft Bristle) #5010GE	 15" Brush Roller Set (Soft Bristle) #5290GE	 12" Brush Roller #5010ER	 15" Brush Roller Set #5290ER
<p>**All four items can be purchased together Service Box #51828ER containing 8 Ultra Bags, an Exhaust Filter, an Electrostatic Microfilter, and a Sealing Strip.</p>			

STANDARD FEATURES OF SEBO VACUUM CLEANERS

World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.

Did you know?

Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at seboCanada.ca to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

To this day, they are the most modern vacuum cleaners in the world!

THE SEBO FILTRATION SYSTEM

Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

Did you know?

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.

MADE IN GERMANY

A lot can happen in 10 years.
