SEBO Duo Dry Cleaning System

SEBO's DUO Cleaning System effectively removes stains and cleans large and small carpeted areas, rugs and upholstery, without using water!

The DUO-P Powder and specialized Brush Machine can quickly clean a room or house full of carpeting! In addition, the DUO Daisy or Hand Brush quickly cleans high-traffic areas, stairs, automobiles, RVs, and boats.

This do-it-yourself, dry-cleaning system is highly effective, easy to use, saves time and money, and avoids potential carpet damage caused by some wet-cleaning methods.

The DUO Cleaning System consists of the following four components (sold separately):

DUO Brush Machine

Cleans large carpeted areas

DUO Daisy Brush

Cleans small to medium-size carpeted areas, like hallways

DUO-P Carpet and Upholstery Cleaning Powder Refill Bag

10 x 1.1lb bags per package
(each bag can clean up to
250 square feet of carpet)
#0468CA

DUO Hand Brush

cleans upholstery, stairs,
hard-to-reach areas, cars and RVs

DUO-P Clean Box
with built-in Spot Brush
(contains one 1.1 lb. bag)
#0478CA

Advantages of using the DUO System are:

- Do-it-yourself, dry carpet cleaning is highly effective, easy to do, and saves time and money
- Almost immediate use of the carpet or upholstery
- Eliminates dust mite allergens
- No need to move furniture and easily cleans stairs
- No detergent residue
- A built-in fiber protector helps to prevent future stains
- Avoids potential damage caused by some wet-cleaning methods
- No carpet shrinking or mildew

SEBO DUO
Brush Machine
#9401FC

DUO Daisy Brush
#CD100

SIMPLE TO USE IN FOUR EASY STEPS

Step One

Apply DUO-P
Cleaning Powder.

Step Two

Spot-clean stubborn stains.
(Older or more stubborn
stains may require
additional treatments.)

Step Three

Brush in the DUO-P
Powder with the DUO
Brush Machine,
Daisy, or Hand Brush.

Step Four

Vacuum when dry,
usually after 30 to 60
minutes.

DUO-P Powder Cleans Carpet and Upholstery

This amazing powder cleans carpet and upholstery to like-new condition and removes even the most stubborn stains! It is made of polyurethane granules that are moistened with a cleaner and is environmentally friendly and safe to use. Unlike other cleaning powders no "pre-spray" is needed. (After opening, tightly seal partially used packages to maintain moisture.)

When the powder is worked into the carpet fibers, the moistened, sponge-like granules lift soil and stains out. Within 30 to 60 minutes, the powder is dry and is removed by vacuuming, leaving the carpet or upholstery clean, dry, and ready for use.

Because this is a dry-cleaning process, DUO-P Powder will not promote the growth of mold and fungus in your carpet and pad. The GAF allergy research center in Germany found that six months after a single cleaning with DUO-P, seven out of ten carpets remained free of dust mite allergens

DUO Daisy and Hand Brushes Provide Quick, Convenient Cleaning

The Daisy is a single brush and is not motorized. However, it is the ultimate in convenience because, with its adjustable handle and very light weight, one can work in a comfortable, upright position and clean both small and medium-size carpeted areas, such as hallways or an entire room. The Daisy even offers two

brush bristle options for different types of carpet: easy or aggressive. Its adjustable handle accommodates user height preferences and enables it to be stored in small spaces. The DUO Hand Brush can be used to clean small areas of carpet and upholstery in homes, cars, boats and RVs.

Why Use Dry Cleaning?

Some wet-cleaning methods inject water and detergent into the carpet pile under pressure, and an extractor is used to collect the liquid and dissolved soil. However, many rental and do-it-yourself machines only remove 50% of the dirty water leaving much of the remaining water to soak into the pad. Often, this amount of moisture will cause deterioration of the carpet backing, and a wet carpet may take 8 to 36 hours to dry, depending on humidity. That is long enough for mold spores to grow. Also, carpets may re-soil quickly because of residual detergent, and spots may reappear in a short period of time, as the moisture and dissolved soil "wicks up" through the carpet fibers.

DUO Brush Machine Cleans Large Carpeted Areas

SEBO's DUO Brush Machine features two spinning brushes that open the carpet pile, enabling the DUO-P Powder to clean each fiber. Weighing only 11 pounds, it is lightweight and easy to use. And with a brush-path width of 12½ inches, a room or entire house of carpet can be quickly cleaned.

Brush Roller

STANDARD FEATURES OF SEBO VACUUM CLEANERS

World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.

Did you know?

Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at seboCanada.ca to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

To this day, they are the most modern vacuum cleaners in the world!

THE SEBO FILTRATION SYSTEM

Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

Did you know?

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.
