SEBO ESSENTIAL G4 and G5

The sturdy ESSENTIAL G is a technically advanced, upright vacuum cleaner that will provide years of reliable use!

There are two models offering a choice between powerhead widths: the ESSENTIAL G4 is 12 inches wide with a 10.5-inch cleaning path, and the ESSENTIAL G5 is 15 inches wide with a 13.25-inch cleaning path. Both heads have one-sided edge cleaning and are designed to clean carpets and hard floors, along with superb pet hair removal.

The G features an electronic controller that acts as a brain, alerting the user to a worn brush, or when brush height is set high for optimal cleaning. It even shuts off automatically when there is a full bag, a clog, or if a brush-roller obstruction occurs, which protects the motor, belts, and carpet from damage.

12-inch ESSENTIAL G4

15-inch ESSENTIAL G5

Durable Matte Finish

The ESSENTIAL G has an exterior housing with a special matte finish that is extra scratch and scuff-resistant, so it looks great even after years of use.

Large 5.5 litre Ultra filter bag

Protective, Rubber-coated Wheels

Its wheels protect all floor surfaces and provide smooth maneuverability.

ESSENTIAL G4 Gray
#90406FC

ESSENTIAL G5 Gray
#90407FC

Additional Features:

Four-level, Manual Brush Height Adjustment

The brush height can be manually adjusted up or down for optimal cleaning effectiveness.

Brush Obstruction Light with Automatic Shut Off

If an obstruction jams the brush roller, the red "check brush" warning light flashes quickly, the brush roller immediately stops spinning, and the vacuum shuts off. This feature prevents the belts from breaking and protects the motor and carpet from damage.

Incorrect Height Setting or Worn Brush Light

When brush height is set too high for optimal cleaning or when the brush roller should be replaced due to bristle wear, the red "check brush" warning light illuminates during use and the vacuum will not automatically shut off. The light shuts off when the condition is corrected, ensuring consistently effective brush agitation of the carpet pile.

Full Bag or Clog Light with Automatic Shut Off

When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, the red "bag full or clog" warning light illuminates, the machine automatically shuts off after 60 seconds, and then the warning light starts continuously flashing. This feature prevents overheating and motor damage from a lack of adequate airflow.

Easy Brush Removal and Cleaning

Cleaning hair or other debris from the brush roller, or replacing it when its bristles are worn, is quick and easy, and no tools are required! This feature ensures consistently effective brush agitation of the carpet pile.

Three-step, Hospital-grade Filtration

It features an S-class, pre-motor microfilter, a three-layer 5.5 litre Ultra Bag, an exhaust filter, and a tightly sealed casing, which prevents dirty air from escaping through its seams. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the demands of users with allergies or asthma.

Durable, Heavy-duty Belts

The reinforced, geared belts do not slip or stretch, resulting in a more efficient use of power, and they should last the life of the machine.

Soft-start Feature

The vacuum's gradual power-up capability extends motor life.

Instant-use Wand and Suction Hose

The integrated, instant-use wand and suction hose are always ready. Just pull out either tool to clean hard-to-reach corners, edges and crevices. The wand and hose together have an eight-foot reach. The suction hose is ideal for cleaning furniture. There is an optional nine-foot extension hose available which creates a total hose length of 15 feet, perfect for cleaning stairs.

Low, 5.5-inch Profile

Lower the handle flat to the floor to clean under beds or lower it to the intermediate stop position to maneuver over rugs. Depress the foot pedal again to bypass the intermediate stop position, or close this position by moving the orange, handle-position slider to the right.

Combination Carrying Handle with Rotating Cord Hook

The vacuum is easy to carry or quickly unwind the cord, using its unique handle with integrated, rotating cord hook.

Three On-board, Full-size Tools

The G machine includes a crevice tool, dusting brush, and an upholstery nozzle. Also, many optional accessories are available.

Attachments				
Included ESSENTIAL G4 and G5	 Crevice Nozzle #1092GS	 Dusting Brush with Horsehair Bristles #1387GS	 Upholstery Nozzle #1491GS	
	 22" Extension Wand* #1084GS	 9' 2" Extension Hose* #1495ER	 Parquet Brush* #1359GS	
*All three items are available individually or as a three-piece attachment kit, #1991AM.				
Optional Three-piece Kit	 Radiator Brush #1496GS	 Flat Upholstery Nozzle #1090HG	 Wall and Floor Brush #1325GS	
	 Hand-held Turbo Brush #6179ER	 Crevice Tool #SEB901F	 Dusting Brush, Nylon Bristles #1329GS	 Dusting Brush, Large Open- ing, Nylon Bristles #1094GS
Bags, Filters, Accessories and Wear Items				
 8 Ultra Bags #5093N	 Exhaust Filter #2846	 S-class, Pre-motor Microfilter #5036ER	 S-class, Charcoal, Anti-odor Pre-motor Microfilter #5425	
 12" Brush Roller #5010ER	 12" Brush Roller (Soft Bristles) #5010GE	 15" Brush Roller #2838ER	 SEBO FRESH 1 Pkg. of 5 #0496	

STANDARD FEATURES OF SEBO VACUUM CLEANERS

World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.

Did you know?

Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at seboCanada.ca to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

To this day, they are the most modern vacuum cleaners in the world!

THE SEBO FILTRATION SYSTEM

Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

Did you know?

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.

MADE IN GERMANY

A lot can happen in 10 years.
We have you covered.
