

WORKS FOR ME

# SEBO Felix Dart

**Our most simplified  
and cost-effective  
upright vacuum**

**Powerful. Versatile. Stylish.**

[www.sebocanada.ca](http://www.sebocanada.ca)

# SEBO FELIX Dart

Don't need fancy features like variable suction control or a swivel neck? The Felix Dart is a simplified and more cost-effective option for those who favour the FELIX 1 PREMIUM but don't need all of the same features.

To clean delicate carpets, simply turn off the roller brush for no-spin cleaning. Or detach FELIX's suction unit and use it as a hand-held vacuum for small jobs. Reach those smaller areas using the conveniently attached hand hose and two attachment tools.

The Felix Dart still includes a 12" powerhead, but it does not include a hard-floor tool. If you like the SEBO Felix but only have hard-floors and rugs, try the FELIX 4 Kombi.

# Additional Features:

## Easy Brush Removal and Cleaning

Cleaning hair or other debris from the brush roller or replacing it when its bristles are worn is quick and easy, and no tools are required! This feature ensures consistently effective brush agitation of the carpet pile.

## A Flat-to-the-floor 6-inch Profile

The vacuum's low profile makes cleaning under furniture and beds easy!

## Full Bag or Clog Indicator

When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, an indicator gauge on the bag housing lid "fills" with orange color and an airflow bypass valve opens, to prevent overheating and motor damage from a lack of adequate airflow.

## Thirty-one Foot Cord with Rotating Quick-release Hook

It is easy to quickly unwind the cord by rotating the hook!

## Easy Maintenance

The clog removal door and brush roller are easy to access on the powerhead.

## Four-level Manual Brush Height Adjustment

The brush can be adjusted up or down for optimal cleaning effectiveness.

## Manual and Automatic Brush Shut Off

The DART can clean delicate rugs or hard floors with straight suction because the brush roller can be manually switched off by pressing the green illuminated on/off button on the powerhead cover. Also, the brush roller automatically shuts off when the neck of the powerhead is in its upright-locked position.

## DART Powerhead - Designed for All Floor Surfaces

The powerhead deep cleans carpets, or its spinning brush roller can be shut off to clean delicate rugs and hard floors with straight suction. It also has easy brush roller removal, and a warning light illuminates when brush height is set too high for optimal cleaning, the bristles are worn, or automatic shut-off occurs due to a brush obstruction.

## Brush Obstruction Light with Automatic Shut Off

If an obstruction jams the brush roller a red warning light on the powerhead flashes and the brush roller stops spinning. This feature prevents the belt from breaking and protects the motor and carpet from damage.

	Attachments			
Included	 12" Power Head	 Crevice Tool #1092GS	 Dusting Brush with Horsehair Bristles #1387GS	
	Exceptions: Crevice Tool - Onyx #1092SW, Rosso #1092GS Upholstery Nozzle - Onyx #1491SW, Rosso #1491GS			
Optional Three-piece Kit	 20" Extension Wand* #1084GS	 9-Foot Extension Hose* #1495ER	 Upholstery Nozzle* #1491GS	
	*All three items are available individually or as a three-piece attachment kit, #1999AM			
Additional Options	 Radiator Brush #1496GS	 Parquet Brush #7200GS	 Kombi Nozzle #7260GS	 Hand-held Turbo Brush #6179ER
	 Crevice Tool #SEB901F			
Bags, Filters, Accessories and Wear Items				
 8 Ultra Bags #7029ER	 Motor Protection Filter #7012	 Anti-odor, Carbon, Motor Protection Filter #7185ER	 Exhaust Microfilters: Onyx #7095ER04 White #7095ER11 Rosso #7095ER12 Marine Blue #7095ER08 Pink Roses #7095ER37 Blue Flowers #7095ER39	
 FELIX Shoulder Strap #7158	 12" Brush Roller #5010AM	 SEBO FRESH 1 Pkg. of 5 #0496AM		

# STANDARD FEATURES OF SEBO VACUUM CLEANERS

## World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

## S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

## Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

*The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.*

## Did you know?

Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

## Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

## Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

## Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

## Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

## Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at [seboCanada.ca](http://seboCanada.ca) to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

# OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

## SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

**To this day, they are the most modern vacuum cleaners in the world!**

## THE SEBO FILTRATION SYSTEM

### Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

### Did you know?

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.
