SEBO 300 and 350 MECHANICAL

The MECHANICAL series are commercial-grade, upright vacuum cleaners that provide the utmost in reliability, durability and cleaning effectiveness!

There are two models offering a choice between powerhead widths: the 12-inch 300 MECHANICAL and the 14-inch 350 MECHANICAL, both designed to clean carpets and hard floors, along with superb pet hair removal.

To maximize durability, these vacuums are entirely mechanical, instead of electronic. In addition, all electrical components are located in the powerhead, with none in the bag housing or handle, thereby minimizing electrical connectors and further improving reliability.

This also means that the on/off switch is located on the powerhead, so the user's foot can easily activate it. Plus, the power cord is externally located, which allows instant, tool-free removal and replacement.

All this, along with simple access to most machine parts, means that maintenance is quick and easy.

12-inch 300 MECHANICAL

14-inch 350 MECHANICAL

Instant-use Wand and Suction Hose

The integrated, instant-use wand and suction hose are always ready. Just pull out either tool, or both together, to clean hard-to-reach corners, edges, and crevices. The wand and hose together have an eight-foot reach.

The suction hose is ideal for cleaning furniture.

An optional **nine-foot extension hose** is available, which creates a total hose length of 15 feet, perfect for cleaning stairs. Choose from a range of optional attachments that can be fitted to the wand or hose!

Additional Features:

Four-level, Manual Brush Height with Innovative Wand Adjustment Technique

For optimal cleaning effectiveness, the brush height has four levels, which the user can adjust, while standing upright, by using the cleaning wand as a convenient aid.

Brush Obstruction Indicator with Automatic Shut Off

If an obstruction jams the brush roller an indicator window notifies the user, the brush roller immediately stops spinning, and the machine shuts off. This feature prevents the belts from breaking and prevents any damage to motor or carpet.

Easy Brush-Roller Strip Removal and Cleaning

The MECHANICAL has a tool-free brush-strip removal, so cleaning hair build-up or replacing it when the bristles are worn is quick and easy.

Full Bag or Clog Indicator

When there is a full bag, a clog in the airflow pathway, or an excessively dirty micro-filter is detected, an indicator window located on the bag housing fills with orange color and a bypass valve opens, to prevent overheating and motor damage from a lack of adequate airflow.

Foot Pedal Stress Release

The quick-release foot pedal maximizes durability, by relieving excessive stress or force on the handle and bag housing, when it's in the upright, locked position.

Two Powerhead Widths with One-Sided Edge Cleaning

The MECHANICAL 300 is 12 inches wide with a cleaning path of 10½ inches. The MECHANICAL 350 is 14 inches wide with a cleaning path of 12½ inches. Both heads have one-sided edge cleaning.

Convenient Carrying Handle

The vacuum is easy to carry with the convenient handle located on the top side of the bag housing.

Rotating Cord Hook

Quickly unwind the power cord using its unique rotating hook.

Thirty-nine-foot Cord

A 39-foot power cord saves time, by reducing the number of electrical outlet changes needed during use.

Easy External Power Cord Replacement with Integrated Strain Relief

A damaged power cord can be quickly replaced without tools or a technician, and it is protected from excessive strain during use by a unique cord-lock mechanism in the handle. This saves time and money.

Huge 5.5 Litre Filter Bag

The large-capacity filter bag is convenient and economical because fewer bag changes are needed. And closing its hygiene cap prevents dust from escaping during bag removal or disposal.

Durable, Heavy-duty Belts

The reinforced, geared belts do not slip or stretch, resulting in a more efficient use of power, and they should last the life of the machine.

Low, 6.5" Power head Profile

Its flat-to-the-floor profile makes cleaning under furniture easy!

Attachments		
Included		Dusting Brush with Horsehair Bristles #1387GS
	Crevice Tool #1092GS	Upholstery Nozzle #1491GS
Optional Three-piece Kit		9-Foot Extension Hose* #1495ER
	20" Extension Wand* #1084GS	Parquet Brush* #1359GS
*All three items are available individually or as a three-piece attachment kit, #1991AM.		
Additional Options		Wall and Floor Brush #1325GS
	Radiator Brush #1496GS	Hand-held Turbo Brush #6179ER
Bags, Filters, Accessories and Wear Items		
10 Filter Bags #5093ER	S-class, Exhaust Filter #50170ER	S-class, Charcoal, Anti-odor, Pre-motor Microfilter #5425
	HEPA, Exhaust Filter #50169ER	
300 Brush Strip #50415	350 Brush Strip #2046 #2046H (Hard - red) #2046G (Soft - green)	SEBO FRESH 1 Pkg. of 5 #0496

STANDARD FEATURES OF SEBO VACUUM CLEANERS

World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.

Did you know?

Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at seboCanada.ca to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

To this day, they are the most modern vacuum cleaners in the world!

THE SEBO FILTRATION SYSTEM

Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

Did you know?

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.

MADE IN GERMANY

A lot can happen in 10 years.
We have you covered.
